# TruckDispatchAgent — Complete Workflow Graph

LangGraph-style state graph: every node is a stage of the agent, every edge is data/control flow. Green = working & tested · Blue = live provider call (bounded) · Amber = refusal / safety branch · Gray dashed = planned or blocked.

working | bounded model/provider call | refusal / safety branch | planned / blocked | worker loop (auto)

truckDisoatcher.md mapped · Job 1 (find & sign carriers) = working · Job 2 (dispatch/booking) = planned/blocked · billing excluded. Raw graph definition also saved as workflow_graph.mmd. Generated 2026-10-28.
